A large offshore oil rig is silhouetted against a bright orange and yellow sunset sky. The rig's complex structure of steel beams, platforms, and a central derrick is visible. The sea is dark and calm in the foreground.

Alicat fabrications manufacture and supply bespoke solutions throughout the UK and further afield

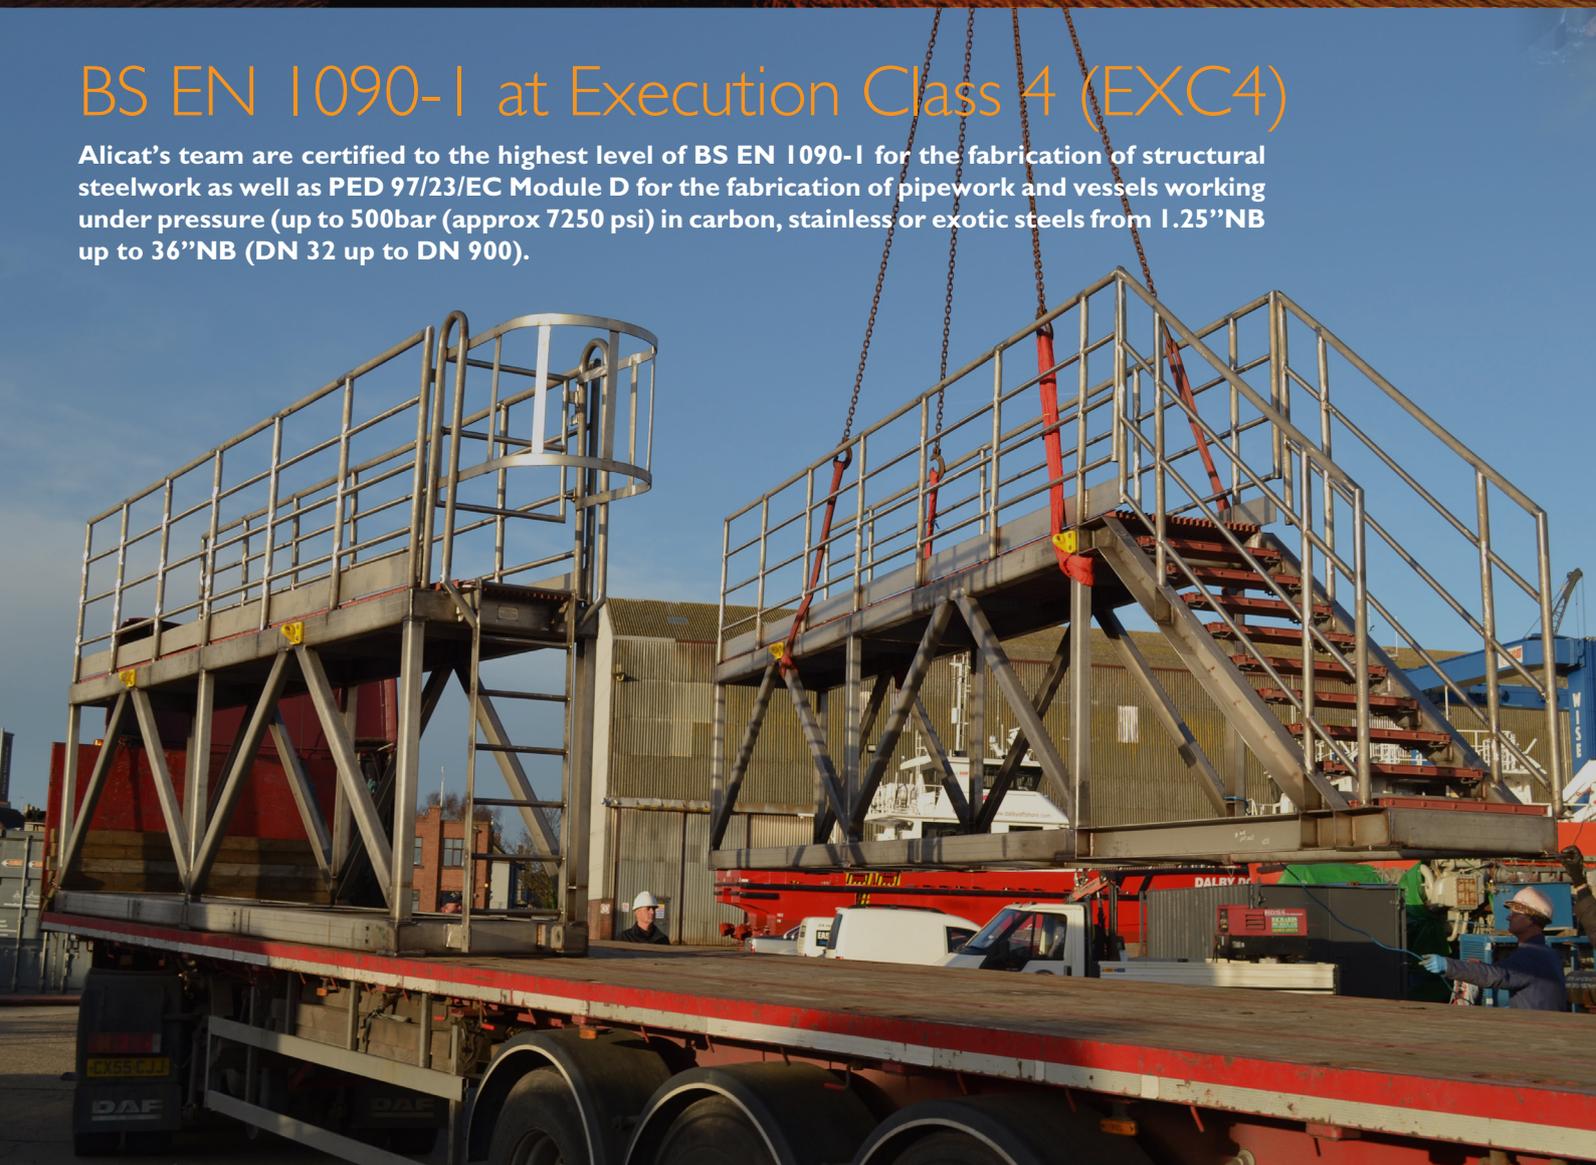

Alicat Fabrications dedicated team of fabricators, coded welders and platers specialise in producing bespoke fabrications in carbon & stainless steel, and aluminium.

Projects include DNV compliant Lifting, Deployment and A-frames, to Pressure Vessels, Baskets, Containers, Hand Rails and Staircases.

Large or small, Alicat Fabrications deliver to the highest quality standards.

BS EN 1090-1 at Execution Class 4 (EXC4)

Alicat's team are certified to the highest level of BS EN 1090-1 for the fabrication of structural steelwork as well as PED 97/23/EC Module D for the fabrication of pipework and vessels working under pressure (up to 500bar (approx 7250 psi) in carbon, stainless or exotic steels from 1.25"NB up to 36"NB (DN 32 up to DN 900).

Alicat Fabrications:

- Fully equipped workshops
- Carbon and stainless steel fabrication
- Aluminium fabrication
- Large seven acre site with 185m of quay heading
- BS EN 1090-1 at Execution Class 4 (EXC 4)
- BS EN 15614-1 & Asme IX certified welders
- AWS D1.1 and D1.6
- ISO 9001:2008 accredited
- DNV GL, BV, BSEN, BSI approved
- PED 97/23/EC Module D
- FPAL Registered
- Direct access to the North Sea

All projects are manufactured, tested and supplied from Alicat's fully equipped workshops at the company's seven acre site in Great Yarmouth. Separate Precision Engineering and Stainless Steel Fabrication workshops enable Alicat Fabrication to complete complex projects all from one location.

Working to the highest standards & certification means the company can undertake projects across most sectors including civil engineering, offshore, marine, industrial, agricultural, leisure and defense.

With 185 metres of quay heading, Alicat has direct access to the North Sea, making Alicat Fabrications the ideal choice for off-shore projects looking to load or install projects directly onto vessels.

concept to completion

The company can manufacture from customers plans, as well as utilising Alicat's in-house drawing office. Using the latest ACAD software, this can help save time in all stages of production. It also means the project can be viewed on screen before any steel even arrives on-site.

4 x head CNC
Profile Cutter

Cutting up to 200mm thick plate
8m x 3m cutting area

Plate Rolling
up to 40mm
& 6m long
