Alicat Precision Engineering  
specialise in the provision of  
quality precision parts across  
all industry sectors, globally

With a strong reputation for providing a prompt and reliable professional service, as well as high quality, durable components manufactured to the highest standards, Alicat have built up a large portfolio of satisfied and loyal customers.

Working in conjunction with the company's Fabrication & Stainless Steel Fabrication divisions, Alicat is able to complete large complex projects, all in-house

Continued investment in both state of the art machinery and ongoing training in industry leading standards ensures Alicat's skilled workforce is well placed to facilitate large scale projects, as well as smaller contracts and one off components.

The company has a wealth of knowledge and experience in the machining of precision engineered components, with expertise in CNC turning and milling using a variety of materials including plastic, nylon, brass, stainless steel, carbon steel and aluminium.

#### Alicat Precision Engineering:

- Quality engineered precision components
- State of the art machinery
- Fully trained CNC machinists
- Complete project management
- ISO Accredited
