Alicat Stainless Steel Fabrications manufacture, and repair bespoke stainless steel projects to exacting standards.

Working from dedicated contamination free workshops, our highly skilled team of engineers and coded welders manufacture and repair bespoke stainless steel projects to exacting standards.

An integral part of our engineering and marine divisions, this specialist department services the daily stainless steel needs of our customers.

Projects include watertight doors and hatches, hand rails, pipework and tanks.

We understand the importance of working to deadlines and pride ourselves on the quality of our work.
